CEASIUM

Technical Artist / Unity Rendering & Scene VFX

Real-time Rendering / Shaders / Visual Effects / Client Development

TECHNICAL SKILLS

Real-time Rendering

Unity / URP

ShaderLab / HLSL

CG / GLSL / RenderDoc

Art & VFX

Blender / Houdini

Substance Painter

Particles / UV Animation

Programming

C# / C++

Python / Lua

TypeScript / JavaScript

React

Collaboration

Git / SVN

Obsidian / Notion

Technical Documentation

Other

Scriptwriting

EDUCATION

The Chinese University of Hong Kong, Shenzhen

Bachelor of Engineering (in progress) — Sep 2024 - May 2028

Major: Computer Science and Technology

Minor: Economics

PROJECT EXPERIENCE

VR Interaction & Rendering

Feb 2026 - Sep 2026

Freedom AI Lab | Prof. Benyou Wang, HCI Group | Unity Development / Rendering

- Built Unity scenes from real oral scan models and adapted them for VR display and interaction, providing working environments for human-computer interaction research.
- Optimized real-time rendering of high-resolution oral models, balancing visual detail with runtime performance during VR interaction.

AI Dashboard Development

Oct 2025 - Jan 2026

ITSO, CUHK-Shenzhen | Technical Services | React Front-end Development

- Developed and iterated on a system serving 1K+ daily active users, implementing React interfaces and features for AI information display and data analysis management.
- Built interfaces for AI meeting minutes and multidimensional table analysis, organizing meeting content and structured data into browsable, actionable views.

PBR Rendering | Diving Bell

Jun 2025 - Sep 2026

Undersea Lighthouse Team | Independent Project | Technical Artist (Rendering)

- Customized Unity URP for horror environments, developing PBR materials and lighting to support the visual atmosphere.
- Implemented volumetric fog and normal blending in shaders; reduced asset rendering costs through texture resizing, channel packing, UV consolidation and mesh reduction.
- Project content received 10K+ saves on Xiaohongshu. Development is paused; some assets are confidential. Further details available on request.

Stylized Toon Rendering | Dong Pin Xi Cou

Mar 2025 - May 2026

Undersea Lighthouse Team | Independent Project | Technical Artist (Rendering)

- Developed a low-poly toon rendering style in Unity URP and water effects covering procedural mesh generation, waves, caustics, reflections and specular highlights.
- Created whirlpool particle effects and UV animations for water and environment motion. The project was shortlisted for CUSGA.

Client Development | Blueyes Artifact

Mar 2025 - May 2026

Card Game Project | VFX / Client Development

- Created pseudo-3D card effects and interactive scene animations, integrating spatial depth and animated feedback into the game client.
- Reached 500+ core closed-test players and exhibited in Shenzhen and Shanghai. Received an Outstanding Work award in the AI+ track of the 2025 Tencent Game Creation Competition.

Game Jam Projects | Card Games

Mar 2025 - May 2026

Team / Individual Projects | VFX / Client Development

- Independently developed or led game client implementation, creating card and scene effects and animations to integrate gameplay and visuals within jam deadlines.
- Awards: Unity Game Jam Excellence Award (Top 20); Best Visual Effects at the Global Game Jam Shenzhen site.
